APPRAISAL AND REPORT IDENTIFICATION

This Report is one of the following types:

☒ Appraisal Report (A written report prepared under Standards Rule 2-2(a) , pursuant to the Scope of Work, as disclosed elsewhere in this report.)

☐ Restricted Appraisal Report (A written report prepared under Standards Rule 2-2(b) , pursuant to the Scope of Work, as disclosed elsewhere in this report, restricted to the stated intended use by the specified client or intended user.)

Comments on Standards Rule 2-3

I certify that, to the best of my knowledge and belief:

- The statements of fact contained in this report are true and correct.
- The reported analyses, opinions, and conclusions are limited only by the reported assumptions and limiting conditions and are my personal, impartial, and unbiased professional analyses, opinions, and conclusions.
- Unless otherwise indicated, I have no present or prospective interest in the property that is the subject of this report and no personal interest with respect to the parties involved.
- Unless otherwise indicated, I have performed no services, as an appraiser or in any other capacity, regarding the property that is the subject of this report within the three-year period immediately preceding acceptance of this assignment.
- I have no bias with respect to the property that is the subject of this report or the parties involved with this assignment.
- My engagement in this assignment was not contingent upon developing or reporting predetermined results.
- My compensation for completing this assignment is not contingent upon the development or reporting of a predetermined value or direction in value that favors the cause of the client, the amount of the value opinion, the attainment of a stipulated result, or the occurrence of a subsequent event directly related to the intended use of this appraisal.
- My analyses, opinions, and conclusions were developed, and this report has been prepared, in conformity with the Uniform Standards of Professional Appraisal Practice that were in effect at the time this report was prepared.
- Unless otherwise indicated, I have made a personal inspection of the property that is the subject of this report.
- Unless otherwise indicated, no one provided significant real property appraisal assistance to the person(s) signing this certification (if there are exceptions, the name of each individual providing significant real property appraisal assistance is stated elsewhere in this report).

Reasonable Exposure Time (USPAP defines Exposure Time as the estimated length of time that the property interest being appraised would have been offered on the market prior to the hypothetical consummation of a sale at market value on the effective date of the appraisal.)

My Opinion of Reasonable Exposure Time for the subject property at the market value stated in this report is: see addendum

Comments on Appraisal and Report Identification

Note any USPAP-related issues requiring disclosure and any state mandated requirements:

- see addendum for additional comments

RESIDENTIAL APPRAISAL REPORT

File No.: LindenHurstCGI

Property Address: 1502 Linden Hurst Ave		City: McLean		State: VA		Zip Code: 22101				
County: Fairfax		Legal Description: Second Bryn Mawr It 33								
SUBJECT	Assessor's Parcel #: 0304 03 0033									
	Tax Year: 2026		R.E. Taxes: \$ 20,713		Special Assessments: \$ 0					
	Current Owner of Record: Moore, Ghazal T & Benjamin C		Borrower (if applicable): -							
	Project Type: ☐ PUD ☐ Condominium ☐ Cooperative ☐ Other (describe)		HOA: \$ ☐ per year ☐ per month							
Market Area Name: Bryn Mawr		Map Reference: 11694		Census Tract: 4707.00						
ASSIGNMENT	The purpose of this appraisal is to develop an opinion of: ☒ Market Value (as defined), or ☐ other type of value (describe)									
	This report reflects the following value (if not Current, see comments): ☒ Current (the Inspection Date is the Effective Date) ☐ Retrospective ☐ Prospective									
	Approaches developed for this appraisal: ☒ Sales Comparison Approach ☐ Cost Approach ☐ Income Approach (See Reconciliation Comments and Scope of Work)									
	Property Rights Appraised: ☒ Fee Simple ☐ Leasehold ☐ Leased Fee ☐ Other (describe)									
	Intended Use: The intended use of this appraisal is to estimate the market value of the subject property as of the effective date to assist the client in a legal proceeding									
Intended User(s) (by name or type): Benjamin C. Moore and or assigns within the context of the stated intended use only										
Client: Benjamin C. Moore		Address: 1502 Lindenhurst Ave, McLean, VA 22101								
Appraiser: John R. Keegan		Address: 6090 Franconia Rd, #D, Alexandria, VA 22310								
MARKET AREA DESCRIPTION	Location: ☐ Urban ☒ Suburban ☐ Rural		Predominant Occupancy		One-Unit Housing		Present Land Use		Change in Land Use	
	Built up: ☒ Over 75% ☐ 25-75% ☐ Under 25%		☒ Owner		PRICE AGE		One-Unit 80 %		☒ Not Likely	
	Growth rate: ☐ Rapid ☒ Stable ☐ Slow		☐ Tenant		\$(000) (yrs)		2-4 Unit %		☐ Likely * ☐ In Process *	
	Property values: ☐ Increasing ☒ Stable ☐ Declining		☐ Vacant (0-5%)		780 Low 0		Multi-Unit 5 %		* To: _____	
	Demand/supply: ☒ Shortage ☐ In Balance ☐ Over Supply		☒ Vacant (>5%)		17,500 High 120		Comm'l 10 %			
	Marketing time: ☒ Under 3 Mos. ☐ 3-6 Mos. ☐ Over 6 Mos.		☐ Vacant (>5%)		1,800 Pred 40		vacant/other 5 %			
	Market Area Boundaries, Description, and Market Conditions (including support for the above characteristics and trends): The subject neighborhood is located within the Bryn Mawr subdivision in McLean, Fairfax County, Virginia. McLean is situated both inside and outside the Capital Beltway (I-495), with areas inside the Beltway being more proximate to commercial centers in downtown McLean and surrounding employment hubs. The neighborhood is located approximately 3.5 miles west of Washington, D.C., and is situated near major commuting routes, including I-66 and the Capital Beltway. The greater McLean area functions as a commuter-oriented residential market, providing access to Washington, D.C., Tysons Corner, and other employment centers along I-66, Route 7, Route 28, and throughout the surrounding region. The Bryn Mawr subdivision is comprised primarily of detached single-family dwellings of varying styles and ages. Ongoing redevelopment is evident within the neighborhood, including renovation and expansion of existing homes, as well as new construction on both vacant sites and properties where older improvements have been razed when financially feasible. - see addendum for additional comments.									
	Dimensions: no plat provided				Site Area: 12,500 sf					
	Zoning Classification: R-4				Description: residential 4 du/ac					
	Are CC&Rs applicable? ☐ Yes ☒ No ☐ Unknown				Zoning Compliance: ☒ Legal ☐ Legal nonconforming (grandfathered) ☐ Illegal ☐ No zoning					
Highest & Best Use as improved: ☒ Present use, or ☐ Other use (explain)				Ground Rent (if applicable) \$ /						
SITE DESCRIPTION	Actual Use as of Effective Date: single-family residential				Use as appraised in this report: single-family residential					
	Summary of Highest & Best Use: The appraiser has judged that the subject's highest and best use is its current use, as a single-family residential dwelling. The improvements as built are assumed to be legal under an approved site plan issued by Fairfax County. If this is found to be otherwise, it may impact the assignment results.

Lender/Client	Benjamin C. Moore						

SITE DESCRIPTION:

Zoning:

The subject is located within the R-4 Residential District of Fairfax County. This district is intended to accommodate single-family detached dwellings at a maximum density of four units per acre and to maintain the low-density residential character envisioned by the County’s Comprehensive Plan. Permitted uses include single-family detached homes, accessory uses, and home occupations, with selected institutional and community uses allowed by special permit or special exception. The R-4 District is designed to preserve stable residential neighborhoods while allowing limited compatible uses and development consistent with the purpose and intent of the Fairfax County Zoning Ordinance.

Highest and Best Use:

The subject is a detached single-family dwelling located within an area zoned R-4. The highest and best use of the site as though vacant would be development of the site to the highest financially feasible density permitted for residential use under current zoning regulations. The highest and best use of the property as improved is the existing residential use, as the current improvements appear to represent an appropriate and legally permissible utilization of the site consistent with surrounding development patterns and market expectations.

Site Comments:

The subject property is impacted by external influences associated with adjacency to commercial property, including reduced privacy and residential separation relative to interior residential locations within the competitive market area. At the same time, the location benefits from proximity and walkable access to retail, dining, and supporting neighborhood amenities, which are recognized by market participants as contributing to overall convenience and accessibility. Analysis of paired sales and grouped market data indicates that properties with similar commercial influences and walkable amenity access exhibit a measurable impact on overall marketability. The subject’s specific locational characteristics were considered qualitatively in the overall analysis and reconciliation of the comparable sales, and no discrete line-item adjustment was applied for this factor.

DESCRIPTION OF IMPROVEMENTS:

The dwelling reflects a series of renovations and modernization completed over time, including a significant main-level renovation completed in 2013. Improvements associated with the 2013 renovation included the removal of partition walls to create a more open floor plan, along with remodeling of the kitchen, family room, and mud room areas. Additional interior updates include a built-in breakfast nook, custom dining room chandelier, built-in dining room cabinetry with wine refrigerator, LVL flooring within the basement area, radiant heated flooring, and replacement interior doors and trim. The floor plan and overall functional utility are consistent with properties of similar gross living area within the competitive market. The HVAC system is estimated to be approximately 10 years old. Exterior improvements include a covered front porch, rear deck, and a landscaped firepit/garden area, contributing to overall outdoor utility. Overall, the improvements and updates are consistent with properties of similar age and design within the market area and support the overall average condition rating assigned in this report.

SALES COMPARISON APPROACH:

Scope of data and market area analysis:

A review of 92 competitive closed sales within McLean and surrounding neighborhoods was conducted, including properties located in West McLean, Langley Oaks, Chesterbrook, Salona Village, Beverly Manor, Hunting Ridge, Franklin Park, Evermay, Lewinsville Heights, and other competing subdivisions within the greater McLean market area. The dataset reflects detached dwellings of similar overall utility, quality, and market appeal, with most improvements constructed between approximately 1975 and 2020, with a concentration in the 1980–2015 range. Sale activity spans the 12 months preceding the effective date of the appraisal, providing a current and relevant sample reflective of prevailing market conditions. Larger estate parcels and atypical properties with significantly excess land area were identified and considered separately where appropriate, with primary emphasis placed on properties reflective of the typical competitive market segment..

Site Area:

Analysis of site size indicates that the majority of competitive properties fall within a range of approximately 5,000 to 25,000 square feet, with a clustering around 10,000 to 20,000 square feet. Market-supported extraction indicates a contributory range of approximately \$4.00 to \$9.00 per square foot for site area differences within the typical range observed in the dataset. An adjustment of \$4.00 per square foot is applied to differences in site area. This rate reflects reconciliation within the mid-range of market-supported indicators and recognizes the diminishing marginal utility associated with larger lot configurations within the McLean market.

addendum				File No. LindenHurstCGI			
Borrower	-						
Property Address	1502 Linden Hurst Ave						
City	McLean	County	Fairfax	State	VA	Zip Code	22101
Lender/Client	Benjamin C. Moore						

Condition:

Condition adjustments were derived through analysis of MLS photographs, MLS descriptions, prior listings where available, and interviews with listing or selling agents when available. The analysis primarily considered differences in kitchen and bathroom renovation levels, overall modernization, finish quality, and effective age relative to the subject property. Market-supported extraction indicates a contributory adjustment range of approximately \$25,000 to \$125,000 for condition differences within the competitive market segment analyzed. Properties reflecting more dated kitchen and interior finishes relative to the subject generally support positive condition adjustments, while properties exhibiting more recent or extensive renovation, including substantially updated kitchen and primary bathroom areas, support negative condition adjustments. All condition adjustments applied within this report fall within the market-supported range identified and reflect overall buyer reaction observed throughout the competitive market area.

Bathroom Count (full and half baths):

Bathroom count analysis reflects consistent market recognition of functional utility with clear differentiation between full and half baths. Market extraction supports a contributory range of approximately \$20,000 to \$40,000 per full bathroom and \$7,500 to \$15,000 per half bathroom, reflecting variation attributable to overall quality, placement within the dwelling, and integration with the floor plan. Adjustments of \$30,000 per full bathroom and \$10,000 per half bathroom are applied. These adjustments are based on paired sales analysis, grouped data extraction, and overall market reaction observed throughout the competitive dataset. All mathematical differences in bathroom count were considered within the adjustment process.

GLA (gross living area):

Gross Living Area analysis indicates that the majority of competitive properties fall within a range of approximately 3,000 to 8,000 square feet above grade. Market extraction supports a contributory range of approximately \$150 to \$300 per square foot for above-grade living area differences. An adjustment of \$200 per square foot is applied to differences in above-grade living area. This rate reflects reconciliation within the mid-range of extracted market indicators and is consistent with observed buyer reaction within the competitive market segment analyzed.

Basement Area (square footage only):

Basement square footage contributes at a lower rate than above-grade living area and is analyzed separately. Market-supported extraction indicates a contributory range of approximately \$40 to \$90 per square foot for basement area differences, depending on overall utility, ceiling height, access, and degree of finish. An adjustment of \$50 per square foot is applied to differences in basement area. This rate reflects the contributory value of below-grade space observed throughout the competitive market dataset and recognizes the secondary nature of basement area relative to above-grade living space.

Garage:

Analysis of garage accommodations indicates consistent market recognition for functional parking, storage utility, and overall convenience. The dataset reflects a range of garage configurations, with most competitive properties offering between two and four garage spaces. Market-supported extraction indicates a contributory range of approximately \$10,000 to \$25,000 per garage space, with variation attributable to integration within the dwelling, overall utility, and market segment positioning. An adjustment of \$20,000 per garage space is applied to differences in garage capacity. This adjustment reflects typical buyer reaction observed throughout the competitive McLean market.

Fireplaces:

Fireplace analysis indicates measurable but secondary contributory value within the competitive market area. The majority of properties analyzed contain between one and three fireplaces, with additional fireplaces contributing diminishing marginal utility beyond typical market expectations. Market-supported extraction indicates a contributory range of approximately \$5,000 to \$15,000 per fireplace, depending on placement, design integration, and overall quality. An adjustment of \$5,000 per fireplace is applied to differences in fireplace count. This adjustment reflects observed market reaction and recognizes fireplaces as an ancillary amenity rather than a primary value driver within the competitive market segment.

File No. LindenHurstCGI					
Borrower	-				
Property Address	1502 Linden Hurst Ave				
City	McLean	County	Fairfax	State	VA Zip Code 22101
Lender/Client	Benjamin C. Moore				

Adjustment methodology:

The adjustments applied in this analysis were derived through a combination of paired sales analysis, grouped data analysis, bracketing techniques, and sensitivity testing across the dataset of 92 competitive sales within the McLean market area. Paired sales were utilized where sufficient similarity existed between properties to isolate the contributory impact of individual characteristics such as gross living area, bathroom count, site area, basement area, garage capacity, fireplaces, condition, and locational influences. Where direct paired sales were limited, grouped market analysis and comparative extraction techniques were employed to observe value trends and overall buyer reaction across multiple properties with varying physical and locational characteristics. Statistical and regression-based analysis were utilized as support tools to test reasonableness, identify consistency in market behavior, and confirm directional support for extracted adjustment rates. All adjustments were subsequently reconciled to a single applied rate or range for each characteristic based on the most consistent and supportable indicators observed throughout the competitive market dataset.

Reconciliation:

All comparable sales presented were considered in the reconciliation of the indicated value by the sales comparison approach. The analysis reflects consideration of the relative similarities and differences between the comparable properties and the subject with respect to location, site characteristics, gross living area, condition, age, quality, functional utility, and overall market appeal, with market-supported adjustments applied where appropriate. The adjusted sale prices were analyzed collectively to develop a final indication of value reflective of prevailing market behavior within the competitive McLean market area. The final opinion of value represents a reconciliation of the overall consistency, comparability, and supportability of the adjusted sales data as a whole.

Borrower	-				
Property Address	1502 Linden Hurst Ave				
City	McLean	County	Fairfax	State	VA Zip Code 22101
Lender/Client	Benjamin C. Moore				

Extraordinary Assumptions:

In determining the gross living area for the subject and comparable sales, the appraiser reviewed multiple data sources. The gross living area for the subject property was determined using available floor plans and Fairfax County tax records, along with MLS tax records. Due to the similarity between the floor plan measurements and the area reported in the MLS tax records, the tax record area has been utilized. For the comparable sales, the appraiser reviewed MLS listings, MLS tax records, and Fairfax Countytax records, and the above-grade square footage reported in the MLS tax records has been used for consistency of reporting. The gross living area and basement area figures utilized for both the subject and comparable sales are assumed to be accurate as reported; however, if found to be otherwise, the assignment results may be affected. The appraiser reserves the right to amend these findings if this assumption is determined to be in error to the extent that it impacts the value conclusion.

The appraiser assumes that any information provided by the client is accurate as reported and that the information regarding the condition and characteristics of the comparable sales reflects their condition at the time of sale. The appraiser relied primarily on MLS photographs, MLS descriptions, agent commentary, and interviews when available to support the condition designations. It is assumed that the information reviewed is accurate; however, if found to be otherwise, the assignment results may be affected.

In light of current economic conditions, including prevailing interest rates and broader market influences, this appraisal is developed under the extraordinary assumption that the comparable sales utilized meet the criteria of arm’s length transactions and reflect typical market behavior. It is further assumed that the reconciled opinion of value based on these sales and supporting data is representative of market value as defined within this report.

It is further assumed that the development and reporting of this appraisal meet the scope of work required by the client and any intended users of the report. If found to be otherwise, the assignment results and conclusions may be affected.

If any of the above items are found to be in error it may have an impact on the assignment results. The conclusions put forth herein are believed to be correct within a reasonable degree of professional certainty.

Definition of Market Value - Fannie Mae B4-1.1-01:

Market value is the most probable price that a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller, each acting prudently, knowledgeably and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby:

- Buyer and seller are typically motivated
- Both parties are well informed or well advised, and each acting in what he or she considers his/her own best interest
- A reasonable time is allowed for exposure in the open market
- Payment is made in terms of cash in U.S. dollars or in terms of financial arrangements comparable thereto; and the price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions granted by anyone associated with the sale.

USPAP Definition of Price:

- The amount asked, offered or paid for a property.

USPAP Definition of Value:

- The monetary relationship between properties and those who buy, sell or use those properties, expressed as an opinion of the worth of the property at a given time.

USPAP Definition of Extraordinary Assumption:

- An assignment-specific assumption as of the effective date regarding uncertain information used in an analysis which, if found to be false, could alter the appraiser’s opinions or conclusions.

Intended Use / Intended Users:

- INTENDED USE: The intended use of this appraisal is to estimate the market value of the subject property as of the effective date for a purchase transaction
- INTENDED USERS: Benjamin C. Moore and or assigns within the context of the stated intended use only

addendum

Lender/Client	Benjamin C. Moore				

1. The chattels in the attached appraisal are built in and are not included in the final value estimate. The chattels/fixtures are considered typical for the area.
2. Data for the attached appraisal were collected from the following sources: MLS and Fairfax County on line records
3. Comparables #1, #2 and #3 are settled sales. All other sales are settled unless otherwise noted.
4. The appraiser has not been informed, nor has the appraiser any knowledge of the existence of any environmental or health impediment, which if known, could have a negative effect on the market value of the subject property. The valuation contained herein is not valid if any hazardous items are found to exist within the subject property and not listed in the appraisal report, including but not limited to : ureaformaldehyde foam insulation, radon gas, asbestos products, lead or lead base products or toxic waste contaminants.
5. A multitude of mortgage financing products are available through lenders in the Washington, D.C. Metro area. It is customary for the seller to pay the required points as charged by the local lending institutions.
6. The present land use for the subject neighborhood, including commercial land use, is considered normal for the area and has no adverse effect on marketability.
7. The scope of the appraisal is based on an inspection of the subject property, and the analysis of information gathered from public or private records that may have an influence on the value of the property.
8. This appraisal is intended for use by the client and or their successors for estimating market value for consideration of mortgage purposes. This appraisal is not intended for any other use
9. The appraiser has not performed any prior services, appraisal, or valuation assignment relating to the subject property within the past three years as an appraiser or in any other capacity.
10. The appraiser recognizes the following definition of exposure time. The estimated length of time that the property interest being appraised would have been offered on the market prior to the hypothetical consummation of a sale at market value on the effective date of the appraisal.
11. The subject market exposure time, for properties from within the subject market area over the past twelve months ranged from 0 to 250+ days. The appraiser considered a reasonable exposure time for the proceeding twelve months to be less than three months. The appraiser has estimated the subject area marketing time to be less than three months based on current interest rates and market factors which are felt to have a positive effect on the subject housing market.
12. In light of the current economic climate, including low interest rates and the actions of the Federal Reserve, this appraisal is based on the extraordinary assumption that the comparables used in this report meet the standards and general acceptance to the definition of "Arms length transaction" and that the reconciled opinion of value based on those sales and other data would be generally accepted as a "Fair Market Value" within the context of any past, present or future economic environment. It is further assumed that the development and reporting of the appraisal (as performed) meets or exceeds the scope of work required by the client and or any intended user of the report. If this is found to be in error it may impact the assignment results.
13. Please be advised that the Present Land Use of 10% "Other" includes that which is not One Unit, 2-4 Unit, Multi Family, or Commercial but does include Schools, Houses of Worship, and Parks. This is considered normal for the subject's market area and is felt to have no adverse effect on the marketability of the subject.
14. The greater than \$10 difference in the price per square foot of gross living area between the subject and the comparables included is considered normal for the area and is felt to have no adverse effect on marketability.
15. Any difference in room or bedroom count between the subject and the comparables included is considered normal for the area and is felt to have no adverse effect on marketability.
16. The highest and best use of the subject property has been determined after consideration of multiple market forces. The highest and best use premise under which the opinion of fair market value has been concluded is based on those legal uses, physically possible uses and financially feasible options which ultimately, and in concert, would result in that use which would provide the greatest net benefit to an owner. The highest and best use premise under which the subject is valued represents the highest and best use of the subject "as-is" or as defined under disclosed hypothetical conditions and or stated extraordinary assumptions.
17. Adjustments made in this appraisal's sales comparison approach are based on a combination of paired sales analysis, market extraction, and appraiser's acumen. Qualitative consideration and market standards of reasonability coupled with market participant surveys have influenced the adjustments made. Due to the nature of the subject and the subject market, the use of quantitative processes alone is not felt to be sufficient to result in a credible opinion of value.

Borrower	-				
Property Address	1502 Linden Hurst Ave				
City	McLean	County	Fairfax	State	VA Zip Code 22101
Lender/Client	Benjamin C. Moore				

18. Figures reported for basement and basement finish below grade are taken from tax records, MLS and jurisdictional websites when available and published. When unreported, these figures are estimated based on MLS data, appraiser's observations, and / or estimates. The appraiser has made every effort to accurately report the basement area and finished area below grade for the subject and the comparables used. The appraiser makes the extraordinary assumption that the figures used reflect the actual size and finish of the basement area of the comparables used. If this assumption is found to be in error, it may significantly effect the indicated value.

MARKET CONDITIONS:

The market condition conclusions are based on a review of several sources including the appraiser's researched market data, the Office of Federal Housing Finance Agency, and the Standard and Poors/Case Shiller index. Appraiser research data reflects the appraiser's concerted effort to determine price and market trends based on settled comparable sales, under contract sales, and active listings within what are deemed to be reasonable parameters. These parameters include factors such as a specific geographic area, the activity in subject's neighborhood, relevant time periods, and in light of conditions of sale related to the greater market. The results of this analysis of these data sources in aggregate form the basis of the conclusions reached in determining market trends.

Changes in Federal Reserve policy over the past several years, including a shift toward a more restrictive monetary stance following the historically low interest rate environment associated with the COVID-19 period, have resulted in elevated mortgage rates relative to prior market conditions. Interest rates have fluctuated over recent quarters, and as of the effective date of this report , typical mortgage rates remain in the approximate range of 6.0% to 6.5%, which continues to influence buyer perception and affordability. This information has been widely reported and is considered by knowledgeable market participants.

The appraiser makes the extraordinary assumption that his peers, if given the same or similar data, would reach the same conclusions. If found to be otherwise, it may impact the assignment results. The value stated is as of the effective date of the appraisal and includes the most current, relevant sales data available. The value indicated does not take into account influences on value attributable to market conditions after the effective date of the appraisal.

The presence of higher borrowing costs, combined with limited housing supply, has contributed to a reduction in transaction volume within the subject's immediate market area and more broadly over the past year. Inventory levels remain relatively constrained, although there has been a modest increase in available listings over recent quarters. Sales activity has been impacted, in part, by property owners retaining existing low-rate financing and opting not to sell. Despite these factors, available data indicates that pricing has generally stabilized, with no consistent or measurable upward or downward trend observed over the past one year. Accordingly, no market conditions adjustments are deemed warranted, and the time elapsed between the contract dates of the comparable sales is considered qualitatively in the overall analysis and reconciliation.
